FULLSTACK SOFTWARE DEVELOPER

I am a highly motivated and experienced software developer with 4 years of experience working for Visma, a leading provider of business software solutions. I specialize in building cloud-based software solutions and have a strong background in JavaScript/Typescript programming languages. My experience working in international teams has allowed me to develop a deep understanding of agile methodology and enterprise-level software development. I am always looking to expand my skill set and stay up-to-date with the latest concepts and technologies in the field.

KEY COMPETENCIES

Javascript / Typescript
React / Nextjs / Angular
C# / .Net

SQL / NOSQL
Front-end
back-end
